-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS; WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recited "type" in claim 18 is indefinite and cancellation is suggested.

The recited abbreviation in claim 21 is indefinite and a full chemical name is needed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lai et al (US 5,496,871) in view of Valint, Jr. et al (US 6,440,571) and Vanderaan et al (US 6,087,415).

Lai et al teaches medical devices made of fumarate and fumaramide siloxane hydrogel compositions in abstract and at col. 1, line 50 to col. 2, line 43.

The instant invention further recites a coating of said medical devices with one or more hydrophilic polymers over Lai et al. However, such coating on medical devices is

Art Unit: 1714

well known practice in the art as taught by Valint, Jr. et al (abstract and example 10) and Vanderaan et al (abstract and examples).

Thus, it would have been obvious to one skilled in the art at the time of invention to coat said medical devices with one or more hydrophilic polymers taught by Valint, Jr. et al and Vanderaan et al since such coating on medical devices in order to increase their biocompatibility and hydrophilicity is well known practice in the art as evidenced by Valint, Jr. et al and Vanderaan et al.

Claims 1-15 are allowed since Lai et al (US 5,496,871) teach away from the instant reactive functional groups (Y) at col. 2, lines 31.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tae H. Yoon whose telephone number is (571) 272-1128. The examiner can normally be reached on Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
